How risky is it?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much the Fund’s returns change over time. This is called “volatility”.

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

RBC Indigo Asset Management Inc. has rated the volatility of this Fund as **medium**.

This rating is based on how much the Fund’s returns have changed from year to year. It doesn’t tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund’s returns, see the **What is a mutual fund and what are the risks of investing in a mutual fund?** section of the Fund’s simplified prospectus.

A word about tax

In general, you pay tax on your share of the Fund's taxable earnings and capital gains you realize from redeeming your investment. The amount of tax depends on the tax rates that apply to you, and the type of earnings realized by the Fund (e.g., interest, dividends, capital gains, etc.) and whether or not you hold your investment within a registered plan, such as a Registered Retirement Savings Plan or Tax Free Savings Account. Keep in mind that if you hold your investment outside of a registered plan, you will receive a tax slip that shows your share of the Fund's earnings. You must report your share of the taxable earnings in your taxable income, whether you receive them in cash or have them reinvested.

Any tax slips you receive will show the amounts in Canadian dollars. In addition, you must calculate your taxable capital gains realized on redemption. When you redeem units of a U.S.-dollar-denominated Fund or series, the book cost of purchases and proceeds are also reported in Canadian dollars and may result in reported capital gains or losses from a change in the value of the Fund units and a change in the value of the U.S. dollar relative to the Canadian dollar.
